Soc Alpha I

Analyst : Benjamin Liu

Date：3/27/2026

Summary

There are 4 alerts included in this report.

- Suspicious PowerShell Download
- Persistence tasks creation
- Autorun key modification
- Suspicious task creation

Investigation screenshot

(P.s. Doing this Lab, please make sure you are in the right TimeFrame in Each Alert investigation.)

Cmdlets (pronounced "command-lets") are lightweight, specialized commands used in the PowerShell environment to perform administrative tasks and automation, typically returning .NET objects. They follow a strict Verb-Noun naming convention (e.g., `Get-Service` , `Stop-Process`)

`Event_EventData_Image:` `C:\Users\nightmare\AppData\Roaming\Microsoft\Windows\Start Menu\Programs\Startup\MSworker.exe`

```
A3 - Autorun Keys Modification
Source: sysmon
Rule : (Event_System_EventID:("12" OR "13" OR "14") AND
Event_EventData_TargetObject:("*\\SOFTWARE\\Wow6432Node\\Microsoft\
Windows*CE*Services\\AutoStart*" OR "*\\Software\\Wow6432Node\\Microsoft\
Command*Processor\\Autorun*" OR "*\\SOFTWARE\\Wow6432Node\\Microsoft\
Active*Setup\\Installed*Components*" OR "*\\SOFTWARE\\Microsoft\
Windows*CE*Services\\AutoStartOnDisconnect*" OR "*\\SOFTWARE\\Microsoft\
Windows*CE*Services\\AutoStartOnConnect*" OR "*\\SYSTEM\\Setup\\CmdLine*" OR
\\Software\\Microsoft\\Ctf\\LangBarAddin*" OR "*\\Software\\Microsoft\
Command*Processor\\Autorun*" OR "*\\Run*")))
TimeFrame : 15-4-2021 08:00 to 15-4-2021 09:00
```

Sysmon 12 RegistryEvent (Object create and delete)
Sysmon 13 RegistryEvent (Value Set)
Sysmon 14 RegistryEvent (Key and Value Rename)

- In real life situation, I do not think the path will be the KQL. Instead, Key words will be more easy to remember and search. So we can summerize the key words, like "Autorun", "Auto", "CmdlLine", "Run", "Installed", and “LangbarAddin.”

```
A4 - Suspicious Task Creation
Source: sysmon
Rule: Event_EventData_Image:*schtasks.exe* AND
Event_EventData_CommandLine:*Create*
TimeFrame : 20-4-2021 10:00 to 20-4-2021 15:00
```

Event_EventData_Image:*schtasks.exe* AND Event_EventData_CommandLine:*Create*

KQL | Apr 20, 2021 @ 10:00:00.00 → Apr 20, 2021 @ 15:00:00.00 | Refresh
